# wincoeasylift®

With more than 35 years of experience, Winco Easylift in Oldenzaal is the renowned supplier of all types of gas springs and related products in the Netherlands and far beyond.

A wide range of different types and designs are our specialty. We supply a wide range of gas springs from our own production and can also quickly and cost-effectively supply replacements for many other brands of gas springs. We also have a wide range of operating and mounting materials for every gas spring application.

Our employees are happy to speak to you personally to advise you in choosing the right gas spring and to answer all your questions.

We do not use a minimum order size and can if desired, even deliver customized gas springs within one working day.

Our capabilities include:

- Technical installation advice using our calculation program
- Delivery of any desired version, length and strength within the technical possibilities.
- Delivery times tailored to customer needs.
- Continuous product development.

You can of course always contact us for additional information regarding our products and / or services.

## A gas spring for every situation

**Blockable  
Gas Springs**

**Gas Spring**

**Tension Spring**

**Lockable Gas  
tension Springs**

Wherever a weight needs to be moved, a gas spring can be the solution offer. The weight can even be reduced to zero. In addition to standard springs, we also make our gas springs customer-oriented and specifically tailored. We supply our gas springs and accessories in various branches, including machine building, furniture industry, food industry, healthcare and overall construction.

## Connecting and mounting

**Connections**

**Brackets**

**Operating  
systems**

**Weld Hinges**

Our gas springs are supplied including connections for a quick and easy mounting possible. In addition, most gas springs are supplied with screw thread on both sides, so that it is always possible to exchange the connections afterwards. Our program includes a very wide choice of various connections so that optimal installation can always be made possible.

## Customized Gas Spring

Finding the right Gas Spring can sometimes be difficult and in certain cases it must be calculated individually per situation in order to be able to select the right Gas Spring for your application.

We use a configurator for this that calculates the exactly fitting Gas Spring including the correct mounting points.

Whether you need pull, push, lockable or tandem Gas Springs or for your application.

Customization is a specialty of  
Winco Easylift.

## NEW - Weld Hinges

In addition to our wide range of rod ends, clevises and ball joints, we have expanded our range with welding hinges. A lot of different sizes are available from our own stock. Like our Gas Springs we don't have a minimum order or purchase quantity. Request your price directly through our website or e-mail.
